

ANDERSEN
STERILIZERS

TECHNOLOGY THAT STERILIZES VIRTUALLY ANYTHING

Andersen's FDA-cleared systems, featuring Ethylene Oxide-Flexible Chamber Technology® (EO-FCT), sterilize nearly all medical instruments, and more! Our low-temperature sterilizers achieve terminal sterilization using just a microdose of ethylene oxide – 17.6 grams per cycle which is equivalent to 1.5 tablespoons. Ethylene oxide is both lethal enough to kill but gentle enough to save.

The list below highlights common items that can be sterilized with EO-FCT. However, many additional items not listed can also be sterilized. If you're unsure about a specific item, please contact Andersen Sterilizers Customer Service at 800.523.1276.

Electronics and Fiber Optics	cameras	drimmels and drills	laptop computers	scopes
	cautery tips	elastic reels	paddles and loads	ventilator valves
	cord and wire	flashlights	phones	ventricular leads
	defibrillator leads	nerve stimulators	staple guns	watches
Implants and Invasive Devices	dental implants	needles	skin staples	ventricular leads
	transfer sets	needle holders	staplers	scopes
	fluid warming line	nerve stimulators	sutures	ventilator valves
	IVF materials	nylon implants	valve implants	ventricular leads
Plastic and Paper	masks	catheters	drapes and gowns	stationary
	bandages	clamps/crimpers	endotracheal tubes	scrub brushes
	basins	gloves	feeding sets	sponges
	syringes	hoses	marking pens	tourniquets
Surgical Instruments	dermal punches	neuter clips	saws	stent sets
	forceps	pin cutters	scalpels	surgery packs
	microdrills	pliers	scissors	temperature probes
	nerve stimulators	rasps	staple guns
